UiPath helps workforces become faster and more productive by accelerating high-volume repetitive processes with software robots.

The leader in the Robotic Process Automation (RPA) industry, UiPath is helping thousands of enterprises around the world automate their business processes with 100% accuracy.

UiPath's RPA platform is made of 3 components:

Digitize your process

Easily create automations in a visual editor across various software applications.

Manage and schedule

Control, monitor, and analyze the performance of your virtual workforce.

Let them work

Assist your robot in its process, or run it unattended from a virtual machine.

The Fastest Growing Enterprise Software Company in History

In 2018, UiPath has seen record-setting growth. Due to the accelerating adoption of RPA, a highly-engaged community, and key technology advancements, UiPath has more than quadrupled its customer-base and been named the leading RPA technology by Forrester Research and Everest Group.

RPA is Accelerating Global Business Growth

As Bill Gates once envisioned, “a computer on every desk,” UiPath envisions a world where there’s a software robot for every person, and thus every repeatable process—business or personal—can get accelerated through automation.

The Proven RPA Leader

Everest Group named UiPath as the “Leader and Star Performer” in Everest’s 2018 RPA Peak Matrix following a year of record growth and the swiftest spike in customer acquisition in the industry.

UiPath is also the only vendor to receive both distinctions two years in a row.²
